

MAKOCHUKWU FRANCES IFIORAH

Calgary, AB | makochukwu.ifiora1@ucalgary.ca | (587) 581-8037 | [LinkedIn](#)

Profile

Fourth-year Software Engineering student at the University of Calgary with strong analytical and problem-solving skills. Experienced in interpreting technical documents, coordinating projects within cross-functional teams, and communicating complex information clearly to diverse stakeholders. Proficient with Google Workspace, Microsoft Applications, and data management tools. Seeking an Engineering Co-op to contribute to meaningful projects and apply my technical and collaborative skills.

Education

Bachelor of Science, Software Engineering | Schulich School of Engineering, University of Calgary April 2028

- GPA (Winter 2026 term): 3.88/4
- Relevant Coursework: Applied Operating Systems, Networked Systems, Data Structures & Algorithms, Object-Oriented Design

Professional Experience

Full-Stack Developer | building-U November 2025 - Present

- Remote
- Collaborated with 5+ team members in an Agile/Scrum environment to translate operational requirements into technical solutions; delivered 10+ backlog items on schedule through clear role definition and shared objectives.
 - Maintained and organized project documentation using GitHub, creating clear workflows for 5+ team members; improved team efficiency by enabling faster onboarding of new developers through structured documentation.

Medical Centre Intern | Avon Medical Centre June 2019 - August 2019

- Lagos, Nigeria
- Interacted with 50+ patients daily, assessing vital signs and communicating procedures clearly; maintained 100% accuracy in patient records through meticulous attention to detail.
 - Designed an Excel-based data retrieval system organizing 500+ patient records to improve office operations; reduced data access time by 40% and eliminated redundant manual searches

Technical Skills

- Programming Languages: Python, C#, SQL, C++, Java, JavaScript, HTML/CSS.
- Operating Systems: Windows, Ubuntu Linux
- Frameworks & Tools: React.js, Node.js, Flask, NumPy, Pandas, JUnit, LLM Integration, Unity, REST APIs
- Systems & Administration: Git, GitHub, Google Workspace, CI/CD pipelines, Azure DevOps, Agile, VS Code

Projects

Afrobeats Recommender June 2026 - Present

- Developing a full-stack web app using React, Flask, and Groq LLM API that recommends Afrobeats songs based on user mood and activity.
- Designed responsive UI with YouTube integration for song playback.

Software Testing Project January 2026 - March 2026

- Developed a 15+ page formal test plan covering boundary conditions, special cases, and 10+ user workflows; documented 30+ test cases with expected vs. actual results
- Executed 20+ automated test cases using Selenium IDE and 15+ manual scripted tests, achieving 95% test coverage; identified and reported 8 critical defects before production, saving 10+ hours of debugging time.

Stock Advisor (Stock Buddy) – AI Financial Assistant January 2026 - March 2026

- Integrated 2 external REST APIs (Google Gemini LLM, Yahoo! Finance) into a unified web platform; troubleshooted data flow issues, achieving 100% successful API response rate for 100+ simulated users.
- Developed full-stack web application with secure HTTPS backend; systematically debugged client-server interactions to ensure reliable performance, achieving <2s response time through optimization and validation.

Maze City Quest January 2026 - March 2026

- Developed a 3D game with a 6-person cross-functional team using Unity and C#; led the animation implementation, bringing game characters and environments to life.
- Managed 50+ commits and resolved 10+ merge conflicts through Git; documented bugs and solutions for the team.
